

109 Glenwood Boulevard,
Schenectady, N.Y.,
Nov. 14, 1922.

My dear Commerford:

Yours of the 8th and 9th are now before me — as, of course, they also have been ere this. But I have been crowded with bread-and-butter business, and various Edisonian matters additional.

The Electrical World had a scathing editorial, October 28th, on Steinmetz (couched in very diplomatic terms, naturally), comparing him the engineer with him the politician. Better look it up as interesting — and informing to those who do not know him as intimately as some others know him, I don't see why he should be allowed to eat his cake and have it, too.

I learn that Truett and the others, at recent executive meeting ^{officials of} of the Edison Pioneers, generally approved my plan for an Edison commemorative monument at Menlo Park, N. J., and that it was referred to the Memorial Committee for action.

In regard to effort to get an award of the Edison Medal to some leader in the past in electrical public utility, I think it perfectly proper for you to communicate the idea (without naming any particular candidate) to all members of the Edison Medal Committee, with an exposition of reasons, the letter to each to be identical with that to the others. In fact, I see no other practicable way of setting the ball to rolling.

Sincerely,

Chas. L. Clarke,
